Coyotes in our neighborhood

Do not run away and never turn your back to them. Stand tall and make yourself look bigger by raising your arms and making loud noises

Always keep pets on leash and close to you

Use deterrents: Carry a loud whistle, pepper spray or a small air horn. They also do not like bright moving lights. Coyotes hate the smell of vinegar which can be sprayed along your back patios or fill a water gun with vinegar

Secure your garbage bins and store inside the garage Keep your pets indoors at night and avoid leaving any food outside. Coyotes look for food, water and shelter

Raise awareness to others in our community so they can be safe.
